## PORJECTS

### Delivery services | Statue: Completed | MERN Stack
● SMS Integration, Rest Api, Google Api, Hashing, Admin, Seller, Client App
This service basically works on a real time basis. Using this service we can buy any local product and also we get information about from which shop we are buying it. Shopkeepers also get information that their product sold. Now when ordered, it gets notified on the delivery app. using this service people buy and sell products from home and also from our shop. No need to go manually at the shop.

### Product enquiry | Statue: Completed | Django, HTML5, CSS3, JS
● Error handles, Hosting, Admin App, Web App, Products, Contacts List, Products Enquiry
There are two sites in this project: 1) Client site. 2) Admin site
Admin can add products and also Edit, Delete & Update products from it. All these changes reflect on the client site. Clients get inquiry about the product and also contact them.

### Many more such projects are underway or completed.
